

**** NEW** SENIOR FELLOWSHIP IN PERSONALIZED MEDICINE**

The Canadian Cancer Trials Group, Queen's University, Kingston, Ontario

The Canadian Cancer Trials Group (CCTG) Operations and Statistical Centre (OSC), based at the Queen's University Cancer Research Institute in Kingston, Ontario is offering a two year Senior Fellowship in Personalised Medicine.

CCTG is Canada's largest academic cooperative group that conducts multi-centre cancer clinical trials in Canada and internationally in forty countries. These studies span the continuum of phase I trials to large randomized controlled trials testing novel agents, technologies and lifestyle interventions. Over 80 member institutions across Canada, ranging in size from major cancer centres to community hospitals, enroll patients on CCTG studies. The CCTG statistical and operations centre, with 12 medical/statistical faculty and over 120 staff is responsible for all aspects of trial management and analysis conducted by the CCTG network.

The Senior Fellow will be based at the OSC and will be supervised and mentored by members of the OSC. Current priority areas of research are evaluating precision medicine and immuno-oncology approaches, and CCTG is currently conducting, or are planning, several cutting edge trials in these fields. In addition to participating actively in all aspects of clinical trial development, conduct and analysis, Senior Fellows have the opportunity to interact with collaborating research facilities and to undertake a practicum in a major pharmaceutical company. The successful Senior Fellow may also participate in the provision of outpatient oncology clinical care at the Cancer Centre of Southeastern Ontario/Kingston Health Sciences Centre. Salary will be determined by the PGY scale and commensurate with experience and qualifications.

Candidates must have an MD or equivalent, and preferably be eligible for licensure by the College of Physicians and Surgeons of Ontario. Preference will be given to candidates that have completed specialty training in an oncology-related discipline (i.e., medical, pediatric or hematologic-oncology).

This Fellowship would be ideal for a candidate interested exploring a career in clinical research. It is anticipated that the inaugural Fellowship would start July 1st 2019.

The University invites applications from all qualified individuals. Queen's is committed to employment equity and diversity in the workplace and welcomes applications from women, visible minorities, indigenous/aboriginal peoples, persons with disabilities, and LGBTQ+ persons. All qualified candidates are encouraged to apply; however, in accordance with Canadian immigration requirements, Canadian citizens and permanent residents of Canada will be given priority.

To comply with federal laws, the University is obliged to gather statistical information as to how many applicants for each job vacancy are Canadian citizens / permanent residents of Canada. Applicants need not identify their country of origin or citizenship; however, all applications must include one of the following statements: "I am a Canadian citizen / permanent resident of Canada"; OR, "I am not a Canadian citizen / permanent resident of Canada". Applications that do not include this information will be deemed incomplete.

Please reply with curriculum vitae and list of three potential referees, including their names, addresses and email to:

*Dr. Janet E Dancey, Director, Canadian
Cancer Trials Group Cancer Research
Institute, Email: jdancey@ctg.queensu.ca*

The University will provide support in its recruitment processes to applicants with disabilities, including accommodation that takes into account an applicant's accessibility needs. If you require accommodation during the interview process, please contact: Tracey St John (tstjohn@ctg.queensu.ca; [telephone+1. 613.533.6430](tel:+16135336430))
