Hematology Meeting Objectives:

- To understand and address, through clinical and translational research, the disease burden associated with hematological malignancy in Canada
- To review recent developments in the understanding of molecular biology and new therapeutics as these relate to Hematological malignancies.
- To update, review, and discuss recent results of clinical studies conducted by or in collaboration with NCIC Clinical Trials Group
- To place the results of clinical studies in the context of ongoing care of patients in Canada with Hematological malignancies and to translate these results into clinical practice
- To provide a learning environment supportive to new investigators
- To understand and apply new clinical trial methodologies in the field of clinical research
